Corporate Internship — **5 Months**

QualityKiosk Technologies, Navi Mumbai — *Data & AI Intern* — *Apr '26 - Jun '26*

Transformation Design	▪ Framed a phased **innovation roadmap**, moving QA effort sizing from gut feel to data-driven estimation. ▪ Authored the **ML estimation PRD**, 20 requirements and 6 regression targets, to replace gut-feel QA sizing. ▪ Assessed **AI data readiness**: scored 38-field estimate-vs-actual records by MAPE per domain as baseline.
Product & AI Delivery	▪ Shipped **7 apps** on one self-built AWS platform plus 3 Python tools in 3 months, beyond the original brief. ▪ Ran spec-first, **AI-orchestrated delivery**: an EARS requirements spec became testable acceptance criteria. ▪ Converted **61 bank CRM workbooks**, 2,157 test cases, into the Azure DevOps schema via Python scripts. ▪ Codified a reusable monorepo blueprint and add-a-module playbook, then re-cut a second scaffold from it. ▪ Built an Excel scoring model with live RMS formulas, so analysts could re-score modules without any code. ▪ Directed Claude Code and Copilot-class **AI coding agents** from the written spec to ship modules faster.

Tata Steel, Jamshedpur — *Research Analyst* — *Apr '25 - Jun '25*
