QualityKiosk Technologies, Navi Mumbai		Data & AI Intern	Apr '26 – Jun '26
Product Delivery	- Shipped 7 apps on one self-built AWS platform plus 3 Python tools in 3 months, beyond the original brief. - Mapped how QA teams sized work, then turned the brief into a phased roadmap with a spec per module. - Built an Excel scoring model with live RMS and threshold formulas, so analysts re-score without code.		
Requirements & Metrics	- Wrote an ML estimation PRD of 20 requirements and 6 targets to shift effort sizing from gut feel to data. Scored 349 banking processes into 56 module and 11 domain complexity scores, sizing testing effort. - Tracked 38-field estimate-vs-actual records, scoring MAPE by domain to expose where estimates missed.		
Tata Steel, Jamshedpur		Research Analyst	Apr '25 – Jun '25
Benchmarking & Research	- Analyzed salary data from 20+ manufacturing firms in Python to map pay gaps across 50+ job profiles. - Structured 1K+ compensation records over 4 qualification tiers into 10+ benchmarked role-based bands. - Standardized 25+ allowance types across firms, enabling like-for-like pay comparison between employers.		
Positions of Responsibility			
Senior Executive Member, Corporate Relations and Placement Committee Negotiated and converted 46 accounts .			2026
- Benchmarked conversion and pay trends across 16 peer IIMs, IITs and B-schools to forecast and retarget recruiter effort. - Scored 174 recruiters on two years of intern, placement and PPO offers, cutting 4 bands to even 10 coordinator portfolios. - Built an AI-assisted outreach workflow enabling the team to send 1M+ corporate connect emails across 50,000+ accounts. - Automated 5+ placement workflows including resume links, database creation and resume sorting, saving 500+ hours. - Led a 20-member Placement Coordinator team through training, weekly reviews, course correction, mentoring 2 directly.

Senior Executive Member, Media and Digital Communication Committee Built 5+ academic websites over 2 years.			2024
Research Papers			
Accepted " Multi-Class Affect Detection in Educational Chatbots: Evidence from Imbalanced Dialogue Data " (Springer, FICTA 2026); the proposed RoBERTa+SVMSMOTE achieved 74.19% recall on the rare Confused class.			2026
Presented " Adoption and Implications of Generative AI in Marketing: A Systematic Review and Research Agenda " (10th Pan-IIM WMC 2025, IIM Ranchi); used PRISMA to review 29 Scopus articles, spanning 2020 to 2025.			2025
Projects			
Influencer-Sponsor Marketplace: Full-Stack Web App in Flask & SQLite			May '24 – Aug '24
- Designed a two-sided marketplace linking sponsors and influencers across 3 user roles, from wireframe to a working app. - Shipped role-based dashboards, search, in-app chat, ratings and flagged-content review across campaign and ad workflows. - Scoped the next release from what the build exposed: richer search and filters, user notifications and an API-first backend.			
Consumer Spend Segmentation: K-means++ Clustering in Python			Sep '24 – Oct '24
- Segmented 62 consumers into 5 distinct spend clusters with K-means++, fixing k on elbow WCSS and 0.540 silhouette. - Tested 3 feature sets against scaling and kept the 2-dimension model, since richer sets separated the segments worse. - Profiled centroids into targetable personas, a 6-member premium cohort at 2.8K/2.9K against 18 price-led at 506/583.
